

Potato Growth Program

Objective: To maximise growth of plant root system and crop yield.

Pre-plant (in-furrow spray)

	Rate:	Comments:
OFS MicroPlus	125-250g/ha	Protects early root growth
New Era Protector	5-8L/ha	All in one soil health improver
Vitazyme	1L/ha	Boosts yields; can spray direct onto soil.

Monthly from planting

OFS MicroPlus	250-500g/ha	Optional - depending on circumstances
New Era Protector	3-5L/ha	Up to 25L/ha per season

At tuber initiation

Vitazyme	1L/ha	Spray to stimulate size, yield and quality
----------	-------	--

Application methods:

Use higher rates if initial treatment is being sprayed onto soil surface
 Vitazyme - spray or via irrigation; increases photosynthate production & crop yield
 OFS MicroPlus & New Era Protector - via irrigation or soil drench
 To be used in conjunction with fertiliser program

Note: All care has been taken to provide advice based on the latest scientific information. This program is supplied as a base program and should be adjusted for individual situation. As individual farms vary significantly, no guarantee or responsibility can be accepted for crop performance. Plant tissue analysis should be used to monitor crop growth and the program altered accordingly.
