

Carrots

Vitazyme Demonstration

Vitazyme improves carrot growth (17-34%)

Two demonstration sites, each with 2 x 1L/ha Vitazyme applications; one demo had earlier application times relative to seeding.

Vitazyme Treatments:

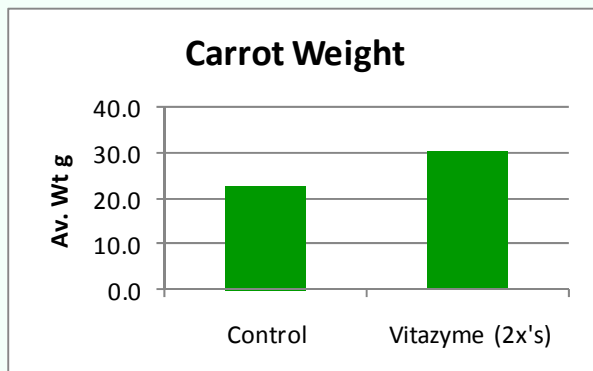

Control Farmer Program
 Vitazyme Soil/Foliar spray plus farmer program

Vitazyme Program:

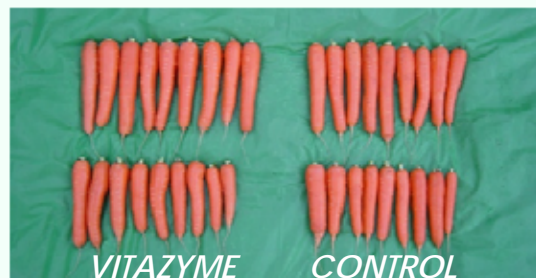

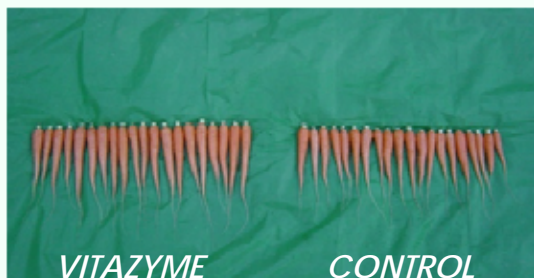

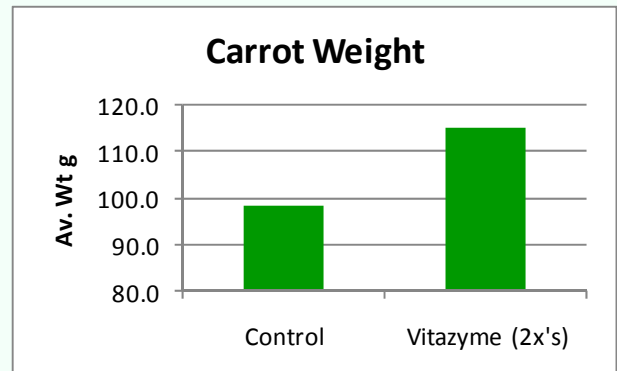

Demo 1 (early) - Soil Spray - 5 DAS; Vitazyme - 1L/ha
 - Soil & Foliar Spray - 48 DAS; Vitazyme - 1L/ha
 Demo 2 (mid) - Soil & Foliar Spray - 28 DAS; Vitazyme - 1L/ha
 - Soil & Foliar Spray - 69 DAS; Vitazyme - 1L/ha
 Monitoring - Demo 1 - Sampled to show early growth (g/carrot)
 - Demo 2 - Sampled at harvest to show final growth (g/carrot)
 (Treated areas were 1 ha block within farmer's crop)

Results:

Demo 1 - Mid crop sample; 34% increase

Demo 2 - Sample at Harvest; 17% increase
