

Natural Fertiliser

New Era Better Grow

Natural Basal Fertiliser

New Era Better Grow is a high quality, pelletised organic fertiliser based on composted poultry manure. It provides a microbe friendly source of nitrogen, phosphorus and potassium for improved soil and plant health.

Certified input for organic farming.

New Era Better Grow encourages better overall plant growth naturally. It is designed as a pre-plant or basal fertiliser to provide natural plant nutrients for all crops. **New Era Better Grow** supports soil biological life, helps balance soil, improves nutrient cycling and mobilises soil nutrient reserves.

The major difference between organic/sustainable fertilisers and synthetic fertilisers is the effect on beneficial soil biology and the solubility of the fertiliser.

New Era Better Grow contains a source of carbon for soil microbes with quick and slow release forms of nitrogen and phosphorus. It also encourages microbial activity in the root zone.

Use as a pre-plant or basal fertiliser at 200 to 2,000kg/ha.
(Confirm your crop requirements via soil analysis)

Typical Analysis: N - 4.0%, P - 1.3%, K - 1.7%, Ca - 1.9%,
(Dry Weight) Mg - 0.28%, S - 0.5%, Fe - 0.18%,
Cu - 130ppm, Mn - 325 ppm, Zn - 240 ppm
