

Onions, Carrots, Lettuce - grown from seed

Onion seedlings - Improved growth with MicroPlus

Carrots yellow flag soil treated with MicroPlus

Control

Vitazyme - 2x soil & foliar spray

Vitazyme - improves yields

Crop Health Program

Objective : To maximise root growth, crop health and yield.

Seed Treatment	Rate	Comments
OFS MicroPlus SI	10g/kg seed	Supports early root growth
Soil spray at seeding		
Vitazyme	1L/ha	Boosts yields; can spray direct onto soil
Monthly from planting		
OFS MicroPlus (soluble)	250-500g/ha	Rate & frequency depends on circumstances
Vitazyme	1L/ha	Spray to stimulate size, yield and quality (1 repeat spray mid crop for lettuce)
Soil Health		
Humus26 or New Era Protector	5-10L/ha 5-8L/ha	Applied at seeding Repeat mid crop
OFS Fish Plus	3-5L/ha	Monthly from seeding for onions and carrots

Application notes

Use higher rates if initial treatment is being sprayed onto soil surface.
 Vitazyme - spray or via irrigation, increases plant energy production & crop yield.
 OFS MicroPlus (soluble), Fish Plus & New Era Protector - via irrigation or soil drench.
 In Green house situations, apply Vitazyme every 14-21 days as a foliar spray.
 To be used in conjunction with fertilizer and disease program.

If prefer kelp, use OFS Super Kelp at 3 - 5 L/ha

Note: All care has been taken to provide advice based on the latest scientific information. This program is supplied as a base program and should be adjusted for individual situations. As individual farms vary significantly, no guarantee or responsibility can be accepted for crop performance. Plant tissue analysis should be used to monitor crop growth and the program altered accordingly.
