

Improve soil health with

OFS Organic Nitrogen

Liquid Organic Nitrogen

For use via irrigation or as a foliar spray.

OFS Organic Nitrogen is a concentrated liquid solution of natural nitrogen which provides a convenient source of nitrogen for broad-acre and horticultural situations.

OFS Organic Nitrogen is enzyme concentrated natural fish that is microbe friendly and an easy to mix formulation.

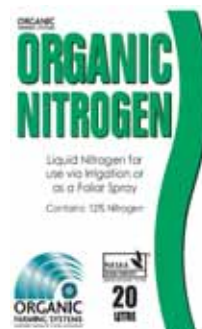

Certified input for organic farming.

Nitrogen is a major constituent of several of the most important substances which occur in plants. It is of special importance that nitrogen compounds comprise 40-50% of the dry matter in protoplasm (the living substance in cells). So as a results and to sustain all growth processes, plants require relatively large amounts of nitrogen.

In organic systems, plants frequently struggle to access sufficient nitrogen, which can result in stunted or relatively under-developed plants and severely reduce yields.

OFS Organic Nitrogen is a convenient source of nitrogen for both broad-acre and horticultural situations – via fertigation or foliar spray.

Readily available nitrogen – for your current crop.

OFS Organic Nitrogen

PACK SIZES: 20L, 200L, 1,000L

APPLICATION RATE:

Via irrigation:	5-10 L/ha
Foliar Spray:	2-5L/ha
Minimum dilution rate:	1:100 – OFS Organic Nitrogen to Water

DIRECTIONS FOR USE: Partly fill spray or fertigation tank prior to adding.

OFS Organic Nitrogen dissolves readily, however some agitation in the spray tank is recommended.

For best results use with 1-2L/ha **OFS Fish Emulsion** as a spray oil or surfactant.

TYPICAL ANALYSIS:

Nitrogen (N)	12%
Potassium (K)	2%

CLEAN UP: Use all mixture in spray tank and purge tank and spray lines with clean water. Do not return spray mix to original container.

STORAGE: Store in original container away from direct sunlight.

SUSTAINABLE FARMING: Natural fertilisers are the corner stone of sustainable farming practices. They improve the microbial activity of soils and provide nutrients to crops in a balanced way.

BIOS CROP PROGRAM: BIOS—Biologically Integrated and Organic Systems
We have sustainable nutritional programs for a range of horticultural crops. These can be based on your soil and tissue testing or you can use our full service of plant and tissue testing with sustainable or full organic recommendations.

Call or email us about our BIOS Program
