

# Potatoes - Yield & Profit Increases Testimonial + 2 Demonstrations

## Potatoes NSW - income increase of \$600/ha

### NSW Potato Grower

"We increased income from our potatoes by \$600/ha with a Super Kelp (2 x 7 L/ha) and Humus 26 (2x10L/ha) program that cost \$126/ha."

### Program

Super Kelp - 2 treatments; one spray at emergence, repeat 4 wks later

Humus 26 - 2 treatments; one spray at planting, repeat prior to row closure

## Potatoes Gingin - 20% increase in harvest weight

Vitazyme used to achieve 20% increase

Application rate: 1L/a (x2)

Frequency: 2 treatments; one spray at emergence, repeated 4 weeks later

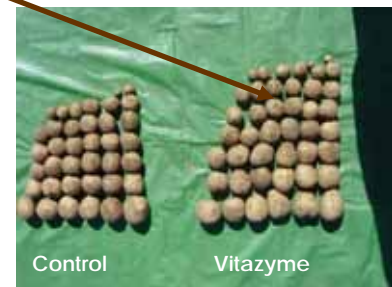

## Potatoes Manjimup - 20% increase in tuber numbers

Vitazyme used to achieve 20% increase

Application rate: 1L/has (x2)

Frequency: 2 treatments; one in-furrow at planting, repeated at tuber initiation.

**Start getting these improvements this season!**  
**Trial a block & measure the improvements now.**

### Recommended Soil & Crop Health Program

At Planting:

125 - 250g/ha MicroPlus, in furrow

1L/ha Vitazyme, in furrow

10L Humus 26, via irrigation

Tuber initiation:

250 - 500g/ha MicroPlus, via irrigation or foliar spray

1L/ha Vitazyme, via irrigation or foliar spray

10L Humus 26, via irrigation

30 days prior to plant death (longer season varieties)

1L/ha Vitazyme

### To maximise biological activity

In furrow

250g/ha MicroPlus; repeated as soil spray at tuber initiation.

Weekly application to leaf and soil

5L/ha ... Humus 26 via irrigation

5L/ha ... Super Kelp via spray or irrigation

5L/ha ... Fish Emulsion via spray or irrigation

5L/ha ... molasses via spray or irrigation
